## SOFTWARE ENGINEER SUMMARY

- I write clean, testable, modular, and efficient code.
- Programming language agnostic, I pick and learn the best tools for the situation.
- Passionate about maximizing profit, minimizing expense, and improving efficiency through automation.

## WORK EXPERIENCE

### BROOKSOURCE

- Collaborated with team on implementing a new ReactJS based micro-frontend executive dashboard in an iterative-waterfall environment with Java Spring microservice backend.
- Dockerized and set up CI/CD through Jenkins with automated snapshot testing of front-end via Jest.
- Helped with collecting, filtering, and ultimately analyzing data from DB2, MySQL, MongoDB, MSSQL, and Oracle databases.
- Created extensive BI integrations and visual presentation graphs.

### UI DEVELOPER

*August 2019-December 2019*

### SO FRIENDLY

- Managed several FullStack NodeJS web and ElectronJS desktop application code bases utilizing ReactJS frontends and HapiJS backends running on AWS.
- Actively collaborated with a diverse and remote development team to ensure the work was complete on time.
- Configured CI/CD through TravisCI to speed up build times and simplify integrations.
- Performed extensive OS specific UI and performance debugging on both Windows and MacOS.

### FULLSTACK DEVELOPER

*May 2019-August 2019*

### LAMBDA SCHOOL

- Manage multiple teams of 5-12 student developers, hosting daily standup meetings
- Monitor student progress, providing written feedback, and identifying areas for improvement
- Diagnose and debug operating system and virtual environment issues
- Host after-hours instruction to provide additional support for students struggling with the current coursework

### TEAM LEAD

*July 2018-April 2019*

## EDUCATION

### LAMBDA SCHOOL

A 9 month long Full-Stack Web Development boot camp with an extensive Computer Science emphasis covering Object-Oriented Programming, Algorithms, Data Structures, Hash Tables, Blockchains, and Computer Architecture.

### FULLSTACK WEB DEVELOPMENT

*April 2018-June 2019*

## SKILLS

Python  
JavaScript  
NodeJS  
GraphQL  
REST  
ReactJS  
SQL  
PowerShell  
Docker  
TravisCI  
AWS

## INTERESTS

- random useless facts (the weirder the better)
- Mexican food (especially tortas)
- New York City (I just recently went in Dec. 2019 with my friends and fell in love with it.)
- antiquated tech oddities (like the moonlight towers in Austin, TX)
- road trips (My favorite is the Florida to North Carolina trip where I only took backroads.)
